

A Better Telephone Experience

If you find yourself constantly struggling to understand family and friends over the phone, you might want to consider **CaptionCall**. The CaptionCall phone has a revolutionary feature: *instant captioning*. The CaptionCall phone almost instantly transcribes what the other party says and *displays the written text on a large seven-inch screen display*. If you are used to reading closed captions on your television, this transition will be natural. There are other great features of this phone too: *photo caller-ID, hearing device connectivity, one-touch dialing, free service and outstanding customer support*.

Your phone conversations will now have added clarity, giving you a higher level of confidence in understanding the important conversations in your life with loved ones, doctors and business contacts.

For more information visit www.captioncall.com or talk to your hearing healthcare professionals at **Ear Associates and Rehabilitation Services**.

FREE LIMITED TIME SERVICE!

* This is a limited time offer that includes a free CaptionCall phone, free delivery and installation assistance, and ongoing free captioning service funded by the FCC.
